**DETAILED ACTION**

(1)

***Allowable Subject Matter***

Claims 3, 5, 6 and 11-17 have been found to be allowable over the prior art of record.

(2)

The following is an examiner's statement of reasons for allowance:

Methods for the formation of window sections from an elongated section via profiling and cladding, such as taught by EP 484,235 to Pellerin et al., are known in the art. Although it is also known to provide such profiled sections with gear channels and connecting elements by various milling and joinery techniques, none of the prior art of record specifically teaches or suggests the particular methodology of forming window section as set forth in applicant claim 15.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

(3)

***Response to Amendments and Arguments***

The amendments and arguments entered upon the filing of the Request for Continued Examination on December 11, 2003 are acknowledged. Based upon a further search and reconsideration of the prior art as applied and of record; and in view of the distillation of the essence of the invention into applicant claim 15, claims 3, 5, 6 and 11-17 have been found to be allowable over the prior art of record as set forth and explained in sections (1) and (2), above.
